

Oasis Family Medicine

(vers 12.13.22)

Dear Patient,

This letter is to inform you of the passing of AB 1797, which states that beginning January 1, 2023, all vaccines administered in California will be required to be entered into the CA Immunization Registry (CAIR). Per existing CAIR law, under [Health & Safety Code §120440](#), all patients/parents/guardians must be told that California medical providers, including Oasis Family Medicine, will submit patient vaccination records and tuberculosis (Tb) test results into CAIR for access by medical care providers and other authorized CAIR users.

I agree and acknowledge the above information.

How to “lock” your/your child’s vaccine records:

Currently, there is nothing a patient/parent/guardian can do to stop this inputting of data (aka no “opt-in” option). There is also no way to fully “opt-out” and completely remove vaccination or Tb information from CAIR. The only option currently available in California is to “lock” your/your child’s CAIR vaccine records. While this will prevent authorized users, such as schools/colleges, licensed childcare facilities, adult care facilities, Foster Care programs, CalWorks and other entities that require vaccine information to participate, from being able to access your/your child’s vaccine information, your/your child’s data will still remain in CAIR and can be accessed by your physician or surgeon and the California Department of Public Health.

Each patient/parent has the right to review their own and/or their child’s record for accuracy, along with the right to decline to share their own and/or their child’s record with other CAIR users by using the ‘lock’ process form linked below. If a patient/parent/guardian changes their mind about limiting access, they can manage their child’s record status to be ‘unlocked’ at any time.

To lock your or your child’s vaccine information in CAIR, complete this form and click

Submit: <https://cairforms.cairweb.org/SharingRequestForm/SharingRequestForm?SharingType=1&Language=En>

It will take 5-7 days for your/your child’s data to be officially locked, and you will receive a confirmation email from CAIR confirming it has been locked.
